Experience

Web Developer at CleverToday

November 2015 – Present

I work in various development environments integrating the front-end of web applications. Platforms vary from Node.js to WordPress to Django. I have also dabbled in back-end development, using test driven development to produce a RESTful API with Node.js and MongoDB. I collaborate closely with both designers and back end developers to deliver pixel-perfect and performant web applications in tight timeframes.

Web Developer at Semaphore Campaigns

May 2015 – Present

In 2015, in collaboration with some very talented colleagues, I founded Semaphore Campaigns, a cooperative that brings together professionals from several domains: political organizing, web development, graphic design, and communications.

I lead the web development side of most projects, and am sometimes responsible for project management.

Translator and Web/Graphic Designer at Fédération étudiante universitaire du Québec (FEUQ)

July 2014 – May 2015

Responsible for translating substantial quantities of research and policy content from French to English, ensuring the quality of English language communications, producing material and developing the visual identity of the Federation. The largest project that year was redeveloping a bilingual, mobile-first WordPress website featuring a clean design and fast performance.

Adjoint Administratif at AÉESG-UQÀM

July 2013 – July 2014

I provide front-line services to students, act in support role to Executive committee, form a part of online communications team, manage IT infrastructure including website.

I updated and optimized the Association's web presence throughout the year.

Coordonnateur aux Affaires Internes at FEUQ

May 2012 – May 2013

Responsible for coordinating communication with student associations, mobilization, social media, the web site and organizing events.

I developed three websites for the organization during my mandate, including a Drupal and CiviCRM based get out the vote platform.
